## How to Use

## Run the following command to start the DoH server in a container

```
docker compose up -d
```

## Example for resolving bing.com

```
d D C
                                              • localhost:8000/?name=bing.com
upgrade - Erro... 🌀 Google 😰 (3) WhatsApp 🧰 (614) YouTube 🚱 IIT MandilInter... 😘 IIT Mai
          "name": "bing.com",
          "type": 1,
          "TTL": 1141,
          "data": "13.107.21.200"
      },
          "name": "bing.com",
          "type": 1,
          "TTL": 1141,
          "data": "204.79.197.200"
```

It uses cloudflare servers to resolve the DNS request over port 443
